Learning Technologies in the European Agenda

Council Recommendation on a comprehensive approach to the teaching and learning of languages

With increasing mobility to the EU and between its Member States, education and training systems need to adapt to the challenges and opportunities posed by Europe's linguistic diversity.

CALL therefore includes:

- Authentic foreign language material, such as video clips, flash-animations, web-quests, pod-casts, web-casts, and news etc.;
- Online environments where learners can communicate with foreign language speakers, through email, text-based computer-mediated communication (synchronous and asynchronous), social media, or voice/video conferencing;
- Language-learning tools (online apps or software), such as for phonetics, pronunciation, vocabulary, grammar and clause analysis, which may include a text-to-speech function or speech recognition, and often includes interactive and guided exercises;
- Online proprietary virtual learning environments, which offer teacher-student and peer-to-peer communication;
- Game-based learning.

CHAT GPT

ChatGPT

Examples

"Explain quantum computing in simple terms" →

"Got any creative ideas for a 10 year old's birthday?" →

"How do I make an HTTP request in Javascript?" →

Capabilities

Remembers what user said earlier in the conversation

Allows user to provide follow-up corrections

Trained to decline inappropriate requests

Limitations

May occasionally generate incorrect information

May occasionally produce harmful instructions or biased content

Limited knowledge of world and events after 2021
